

ToughTorq Hydraulic Torque Pump Series

Battery, electric, and pneumatic hydraulic power for controlled bolting

Model	Power	Pressure	Flow	Reservoir	Power/Air	Weight

TTQ-BATT-10K-48V	Battery	10,150 psi	1.27 GPM 1st	Small/Large	48V / 26Ah	-
KLW-2000	Electric	700 bar	7.0 / 0.7 L/min	5 L	1.1 kW	28 kg
KLW-3000	Electric	700 bar	7.0 / 1.6 / 0.8	8 L	1.1 kW	28 kg
KAT-3000	Pneumatic	40-700 bar	7@70 / 1.26@300 / .63@700	8 L	4â 8 bar air	22 kg

Hydraulic Torque Pump Selection

Match the pump as part of the complete hydraulic bolting system

Confirm wrench maximum working pressure and required flow.

Match hydraulic hose and quick-coupler pressure ratings.

Account for number of connected tools and simultaneous operation.

Size reservoir capacity for the selected wrench system and duty cycle.

Confirm available battery, electrical, or compressed-air supply.

Use the canonical ToughTorq hydraulic torque wrench specifications when matching wrench torque requirements to the selected pump.
